

## Brown Bag Lunch

***“Increased stability in Land Management as Basis for a Sustainable Economy and Social Development – 20 years of Experiences”***

Hosted by the Swiss Executive Director and the Swiss Land Management Foundation.

Date: Tuesday, March 15, 2016

Time: 1:00 pm - 2:00pm

Room: tba

### Agenda:

- Welcome note by Joerg Frieden, PhD, Executive Director on the Board of the World Bank Group
- "Our Approach and Achievements" by Daniel Steudler, PhD, Vice-President SLM and Scientific expert at Swiss Federal Office of Topography swisstopo
- Q&A

Based on practical work carried out by members of the Foundation, SLM will highlight its approach and achievements in land management and administration projects:

- Azerbaijan: reliable and transparent land registration system, legal framework, project management;
- China: flood monitoring and forecasting, GIS and satellite image processing, hydrological modelling;
- Kosovo: donor coordination, land administration framework, democratic and sustainable development.

SLM's experiences show that integrated and inclusive approaches – taking under-represented groups into account – provide more stable and sustainable results.

Swiss Land Management is a private foundation aiming at transferring experiences of methodologies and technologies contributing to achieve the UN Sustainable Development Goals. The foundation acts as a think tank in the land related fields of development and management. SWISS LAND MANAGEMENT is a close cooperation between the private sector and the Swiss Government.
